

Form Generalizations

A **generalization** is a broad statement based on convincing examples. Juan is an example of a man who learns the importance of helping others. Answer each question about Juan. Look back through the selection if you need to. Then use your answers to form a generalization about helping others.

1. Why, at first, does Juan help people with their crops in the fields? _____

2. What generalization would describe what Juan feels when he's helping people in their fields? _____

3. Make a generalization about how Juan learns a lesson from other people. What does he learn? _____

4. Make a generalization about how Juan's character changes by the end of the story.

5. Based on the example of Juan, make a generalization about the importance of helping others. _____
